

Chatsworth Products, Inc. helps companies organize, store and secure technology equipment. CPI's line of structural support solutions includes racks, cabinets, and cable management and pathway support products.

Eastern Wire + Conduit was established in the 60s, to provide custom flexible conduit and armoring services. Over the years Eastern has enjoyed a very consistent growth and now holds the distinction of being a true North American leader in the development of specialty protection and identification products and services, especially with regards to Optical Fiber and UTP copper wire. [www.easternwire.com](http://www.easternwire.com) The product line now includes Quickstop fire stopping safety products. Quickstop product details are found at [www.easternwire-quickstop.com](http://www.easternwire-quickstop.com).

For over 100 years, Megger® has been the premier provider of electric test equipment and measuring instruments for electrical power applications. Although we're best known for our world famous range of insulation testers, Megger® provides all of your Telecommunication and Datacom testing and measurement needs.

Headquartered in Leominster, Massachusetts, Mohawk has been providing fiber and copper cable innovations for over 50 years. Our headquarter location dedicates 210,000 square feet to today's most advanced facilities for the design, development and production of copper, fiber optic, and hybrid wire and cable. <http://www.mohawk-cable.com/>

QUIKTRON  
CONNECTIONS  
OF QUALITY

Quiktron manufactures high quality fiber and copper cable assemblies. Its products include fiber patch cords, multi-fiber cable assemblies, custom copper cables, economy fiber patch cords and economy copper cables.

Tappan Wire & Cable was founded in 1978 as a manufacturer of specialty wire and cable for the communications and computer industries. From a company that began in a 25,000 square foot plant located in Tappan NY, to our current 200,000 square foot modern manufacturing and stocking facility in Blauvelt, NY, Tappan Wire & Cable has continued to grow to meet the market demands for wire and cable in the Industrial, Security, and Communications Industries.
